

AIR-TO-GROUND

Air-to-ground banner target made of resistant nylon mesh, framed with water-resistant canvas and straps for assembling and scaffolding. With a round central target in black for long-distance visibility.

DESCRIPTION

- Developed for leveled bombing and ground attack training exercises.
- Applicable for helicopters and aircrafts pilots training.
- It can be assembled vertically, for lateral shooting training as well as horizontally, in sandboxes, for top-down shooting training.
- Its nylon mesh allows training with 20mm, 30mm and 50mm projectiles.
- These targets are available in different sizes and can be applied for different training needs.
- Possibility to develop customized target sizes to answer to specific training requirements.

VERSIONS:

- AV-1TTE – 4.5m X 4.5m
- AV-2TTE – 6.0m X 6.0m
- AV-3TTE-BN – 7.0m x 2.9m
- Customized sizes
