

EQ-BRD-20 BOMB AND ROCKET DISPENSER

The bomb and rocket dispenser has been developed to answer the requirements of bombing and rocketry training and can carry four 2.75"/70mm rockets and six practice bombs.

DESCRIPTION

- It includes both 14" and 30" standard NATO mounting lugs.
- It operates with MK4, MK40, SBAT70 folding fin aerial rockets (FFAR) and practice bombs such as BEX-11 or BDU-33.
- Bomb and rocket firing is programmed by use of two intervalometers, one for the rocket firing circuit and one for the bomb firing circuit.
- The dispenser can operate under single and ripple firing modes and, in the case of the exercise bombs, also under salvo firing mode.

Dimensions: Total length: 3,100 mm; Total width: 495 mm
Empty weight: 125 kg
